

Certified Associate Industrial Network Training

Moxa certifications validate your expertise and ability to keep pace with modern technical roles and solve the challenges of advanced projects in industrial networks with Moxa technologies and products.

About the course

Theory and hands-on practical training supported by Madison Technologies' certified Moxa Trainer.

The Moxa Certified Associate Industrial Network Training (MxCA) 2-Day course is designed to give systems integrators and engineers the opportunity to build confidence and familiarity with networking and troubleshooting Moxa's industrial solutions.

Where possible, the course is limited to 8 seats per session to optimise the learning environment. Upon successful passing of the course, students will receive an official certification from Moxa.

Prerequisites

Participants must have a basic understanding of industrial networks and/or IT technologies.

What to bring

- Windows OS laptop with
 - Internet Explorer installed
 - Admin rights to install MOXA software
 - USB Port
 - Ethernet network port
- AC power supply for the laptop
